

Travel Pal

Scan and Shop with Confidence

What is Travel Pal?

Travel Pal is an AR travel assistant that combines translation, allergy alerts, and product reviews to help travelers shop smarter abroad.

What problem does it solve?

When traveling, people often hesitate to buy unfamiliar products because:

- They can't read the language on the packaging
- They don't know if the item contains allergens or restricted ingredients
- They're unsure of the product's quality or reputation

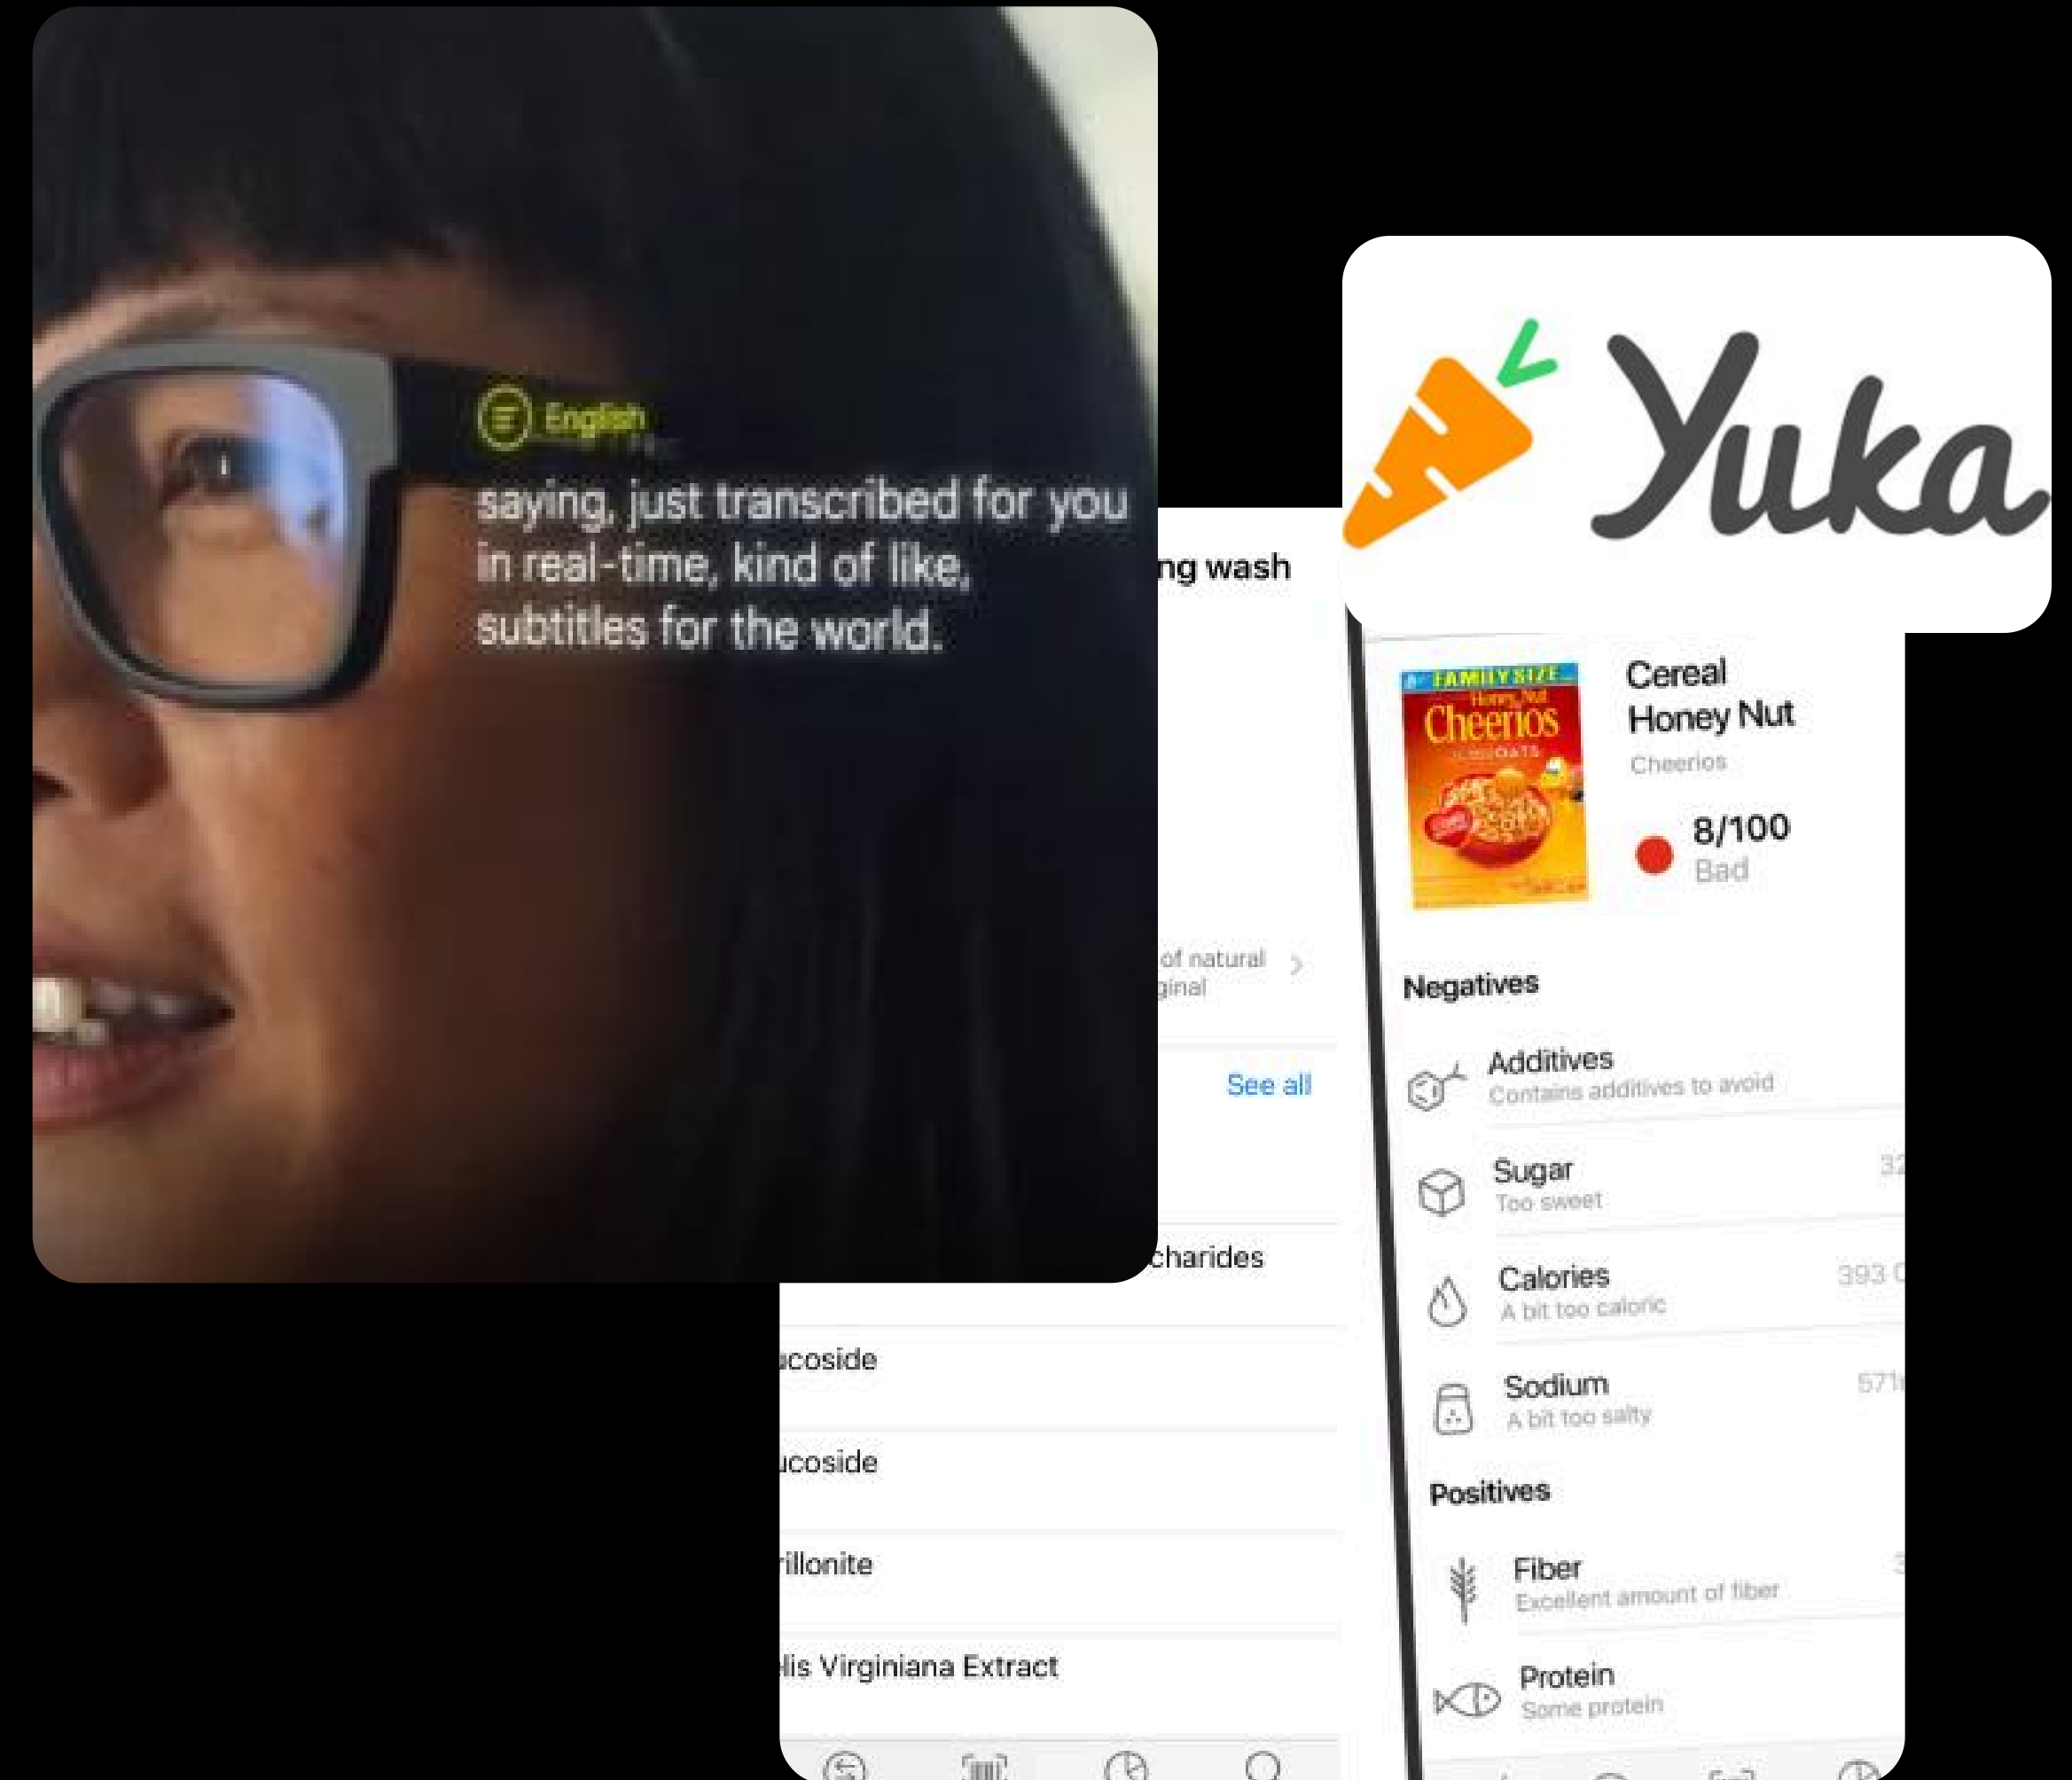

“Users don’t want to read the ingredients themselves”

Target Users

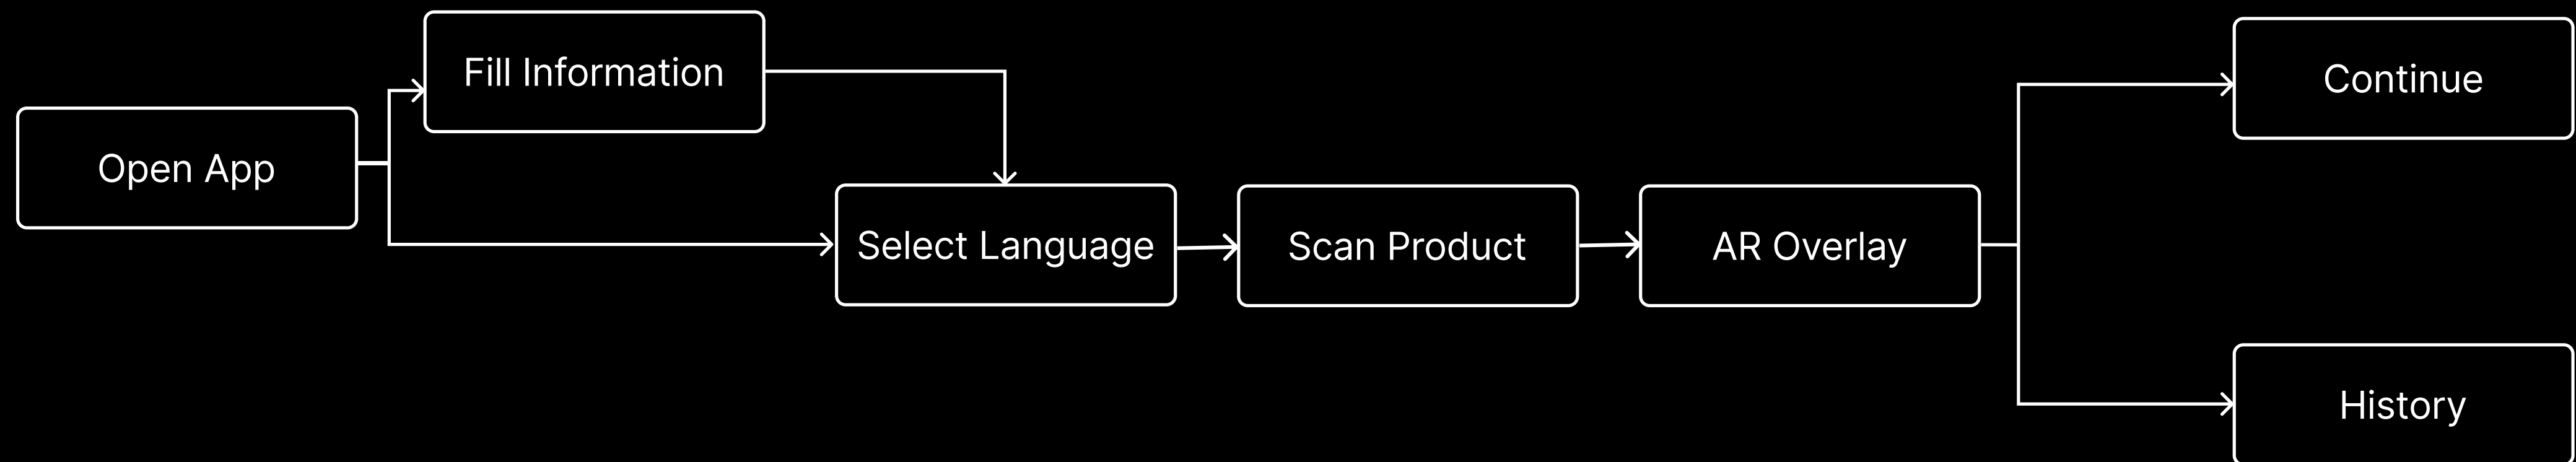

1. General Tourists
Understand product across language barriers.
2. Travelers with dietary restrictions or allergies
Check if products contain substances they need to avoid for health or religion.
3. Health-Conscious Travelers
Seek products with clean and safe ingredients for a healthier lifestyle.

Project Overview

Travelers often find unfamiliar products while shopping abroad and hesitate to buy them due to limited information. This project builds on AR translation tools by including product reviews and ingredient insights, helping users make smarter decisions on the go.

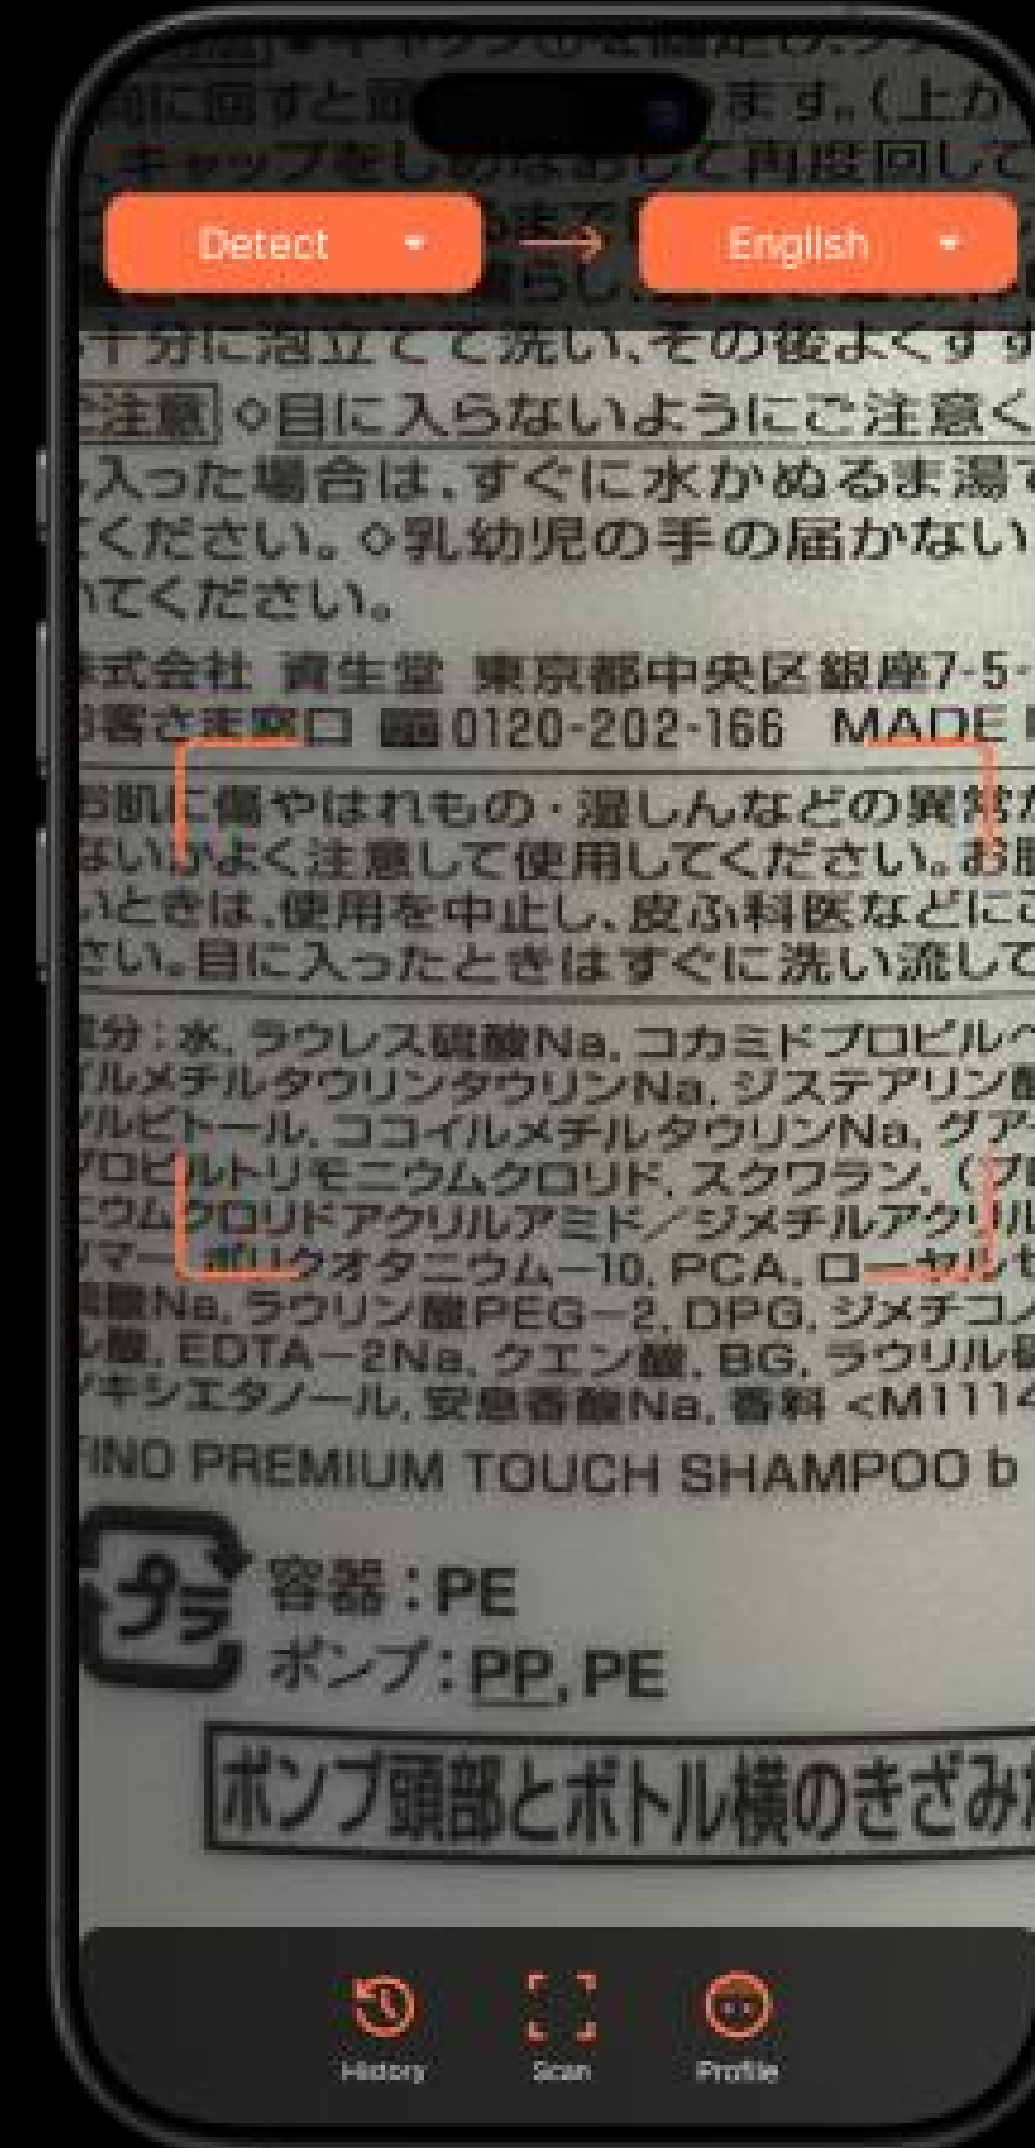

User Flow

Features

Language Detect

This feature helps travelers detect the local language by scanning products.

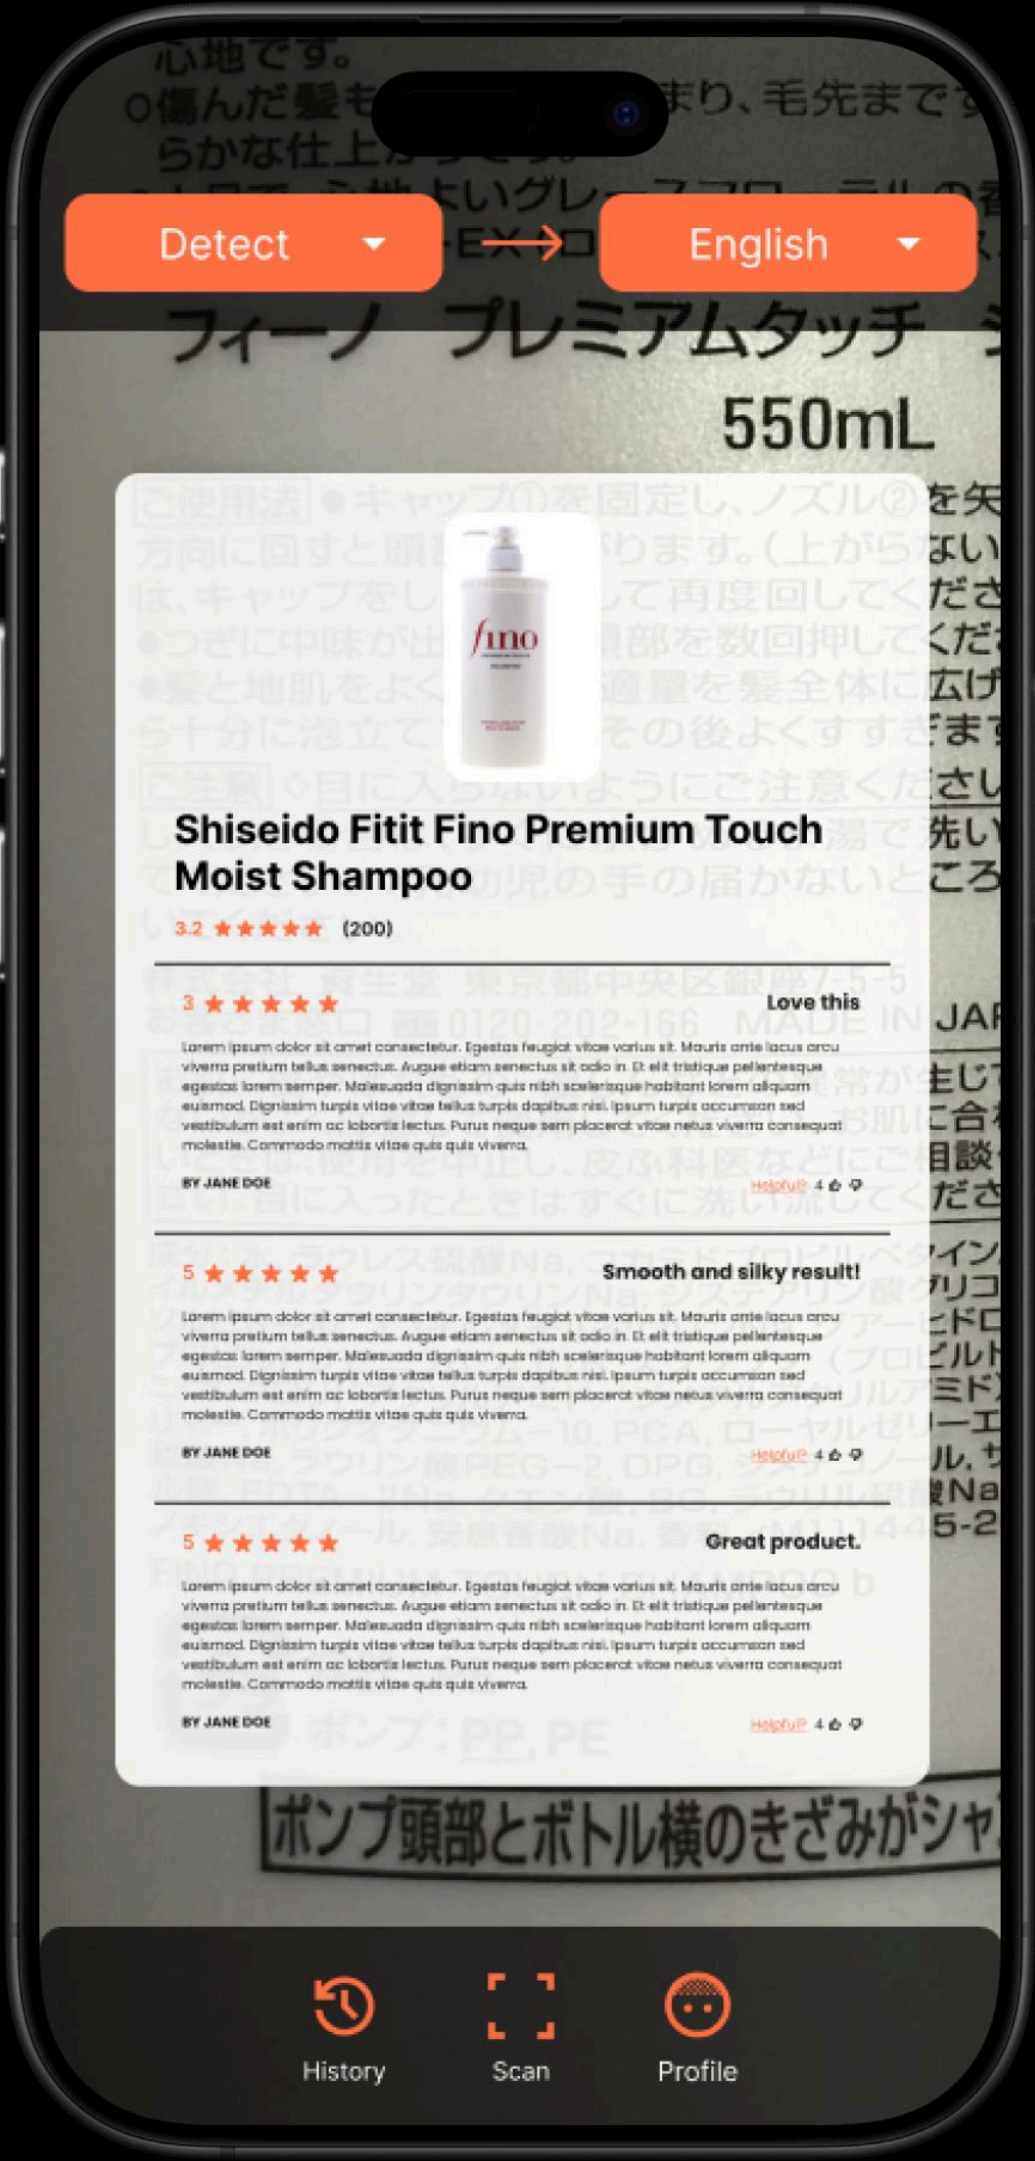

Real-Time Alert

Use Augmented Reality (AR) to scan products and instantly view important health information like ingredient lists, allergens, and nutritional values.

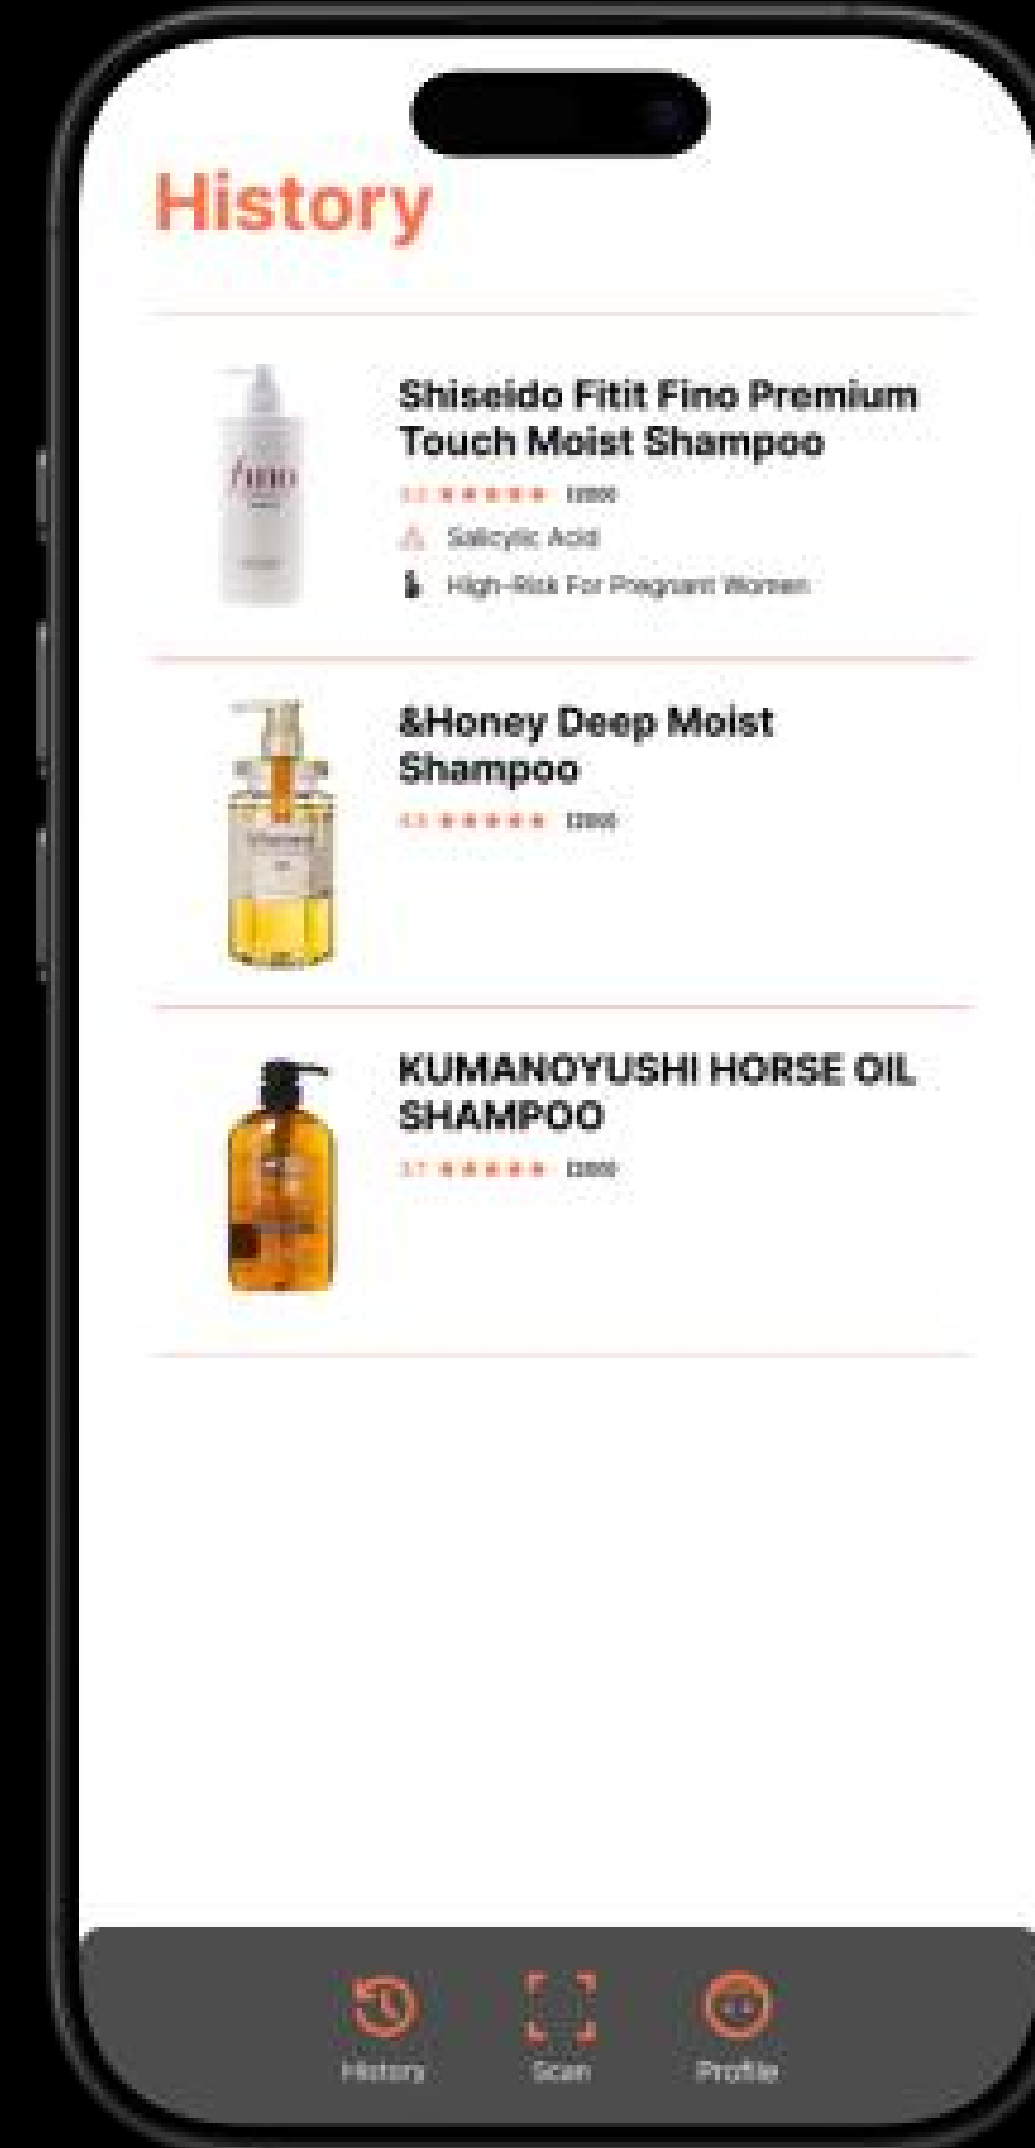

Reviews & Ratings

By integrating reviews and star ratings into the AR overlay, users gain trustworthy insights without switching apps.

History

Automatically stores scanned items, translations, and product details so travelers can revisit past information without rescanning.

Customized Profile

Allows users to define their allergy sensitivities and shopping preferences, so the experience can be tailored to their unique needs while traveling.

Profile

Skin Type
Help The System Recommend Better Skincare And Cosmetic Products.

☐ Dry ☐ Oily ☐ Combination ☐ Sensitive
